Missing

Transverse Lady Beetle (Coccinella transversoguttata)

Reward

Gratitude and thanks from the VAL team!

Last Seen: 1986 – Salisbury, VT

Habitat: Habitat generalist, utilizing gardens, parks, forests, meadows, riparian zones, and

agricultural crops.

Particularly easy to confuse with the Three-banded Lady Beetle, separated by the pronotum markings (the 3-banded has a pale margin across the front, connecting the pale patches). Also confused with Mountain, Hieroglyphic, and 5-spotted Lady Beetle.

If found:

Photograph the head, pronotum, and wing covers. Make sure you get different angles of the pronotum and wing covers so the head, pronotum, and elytral markings are clearly visible.
